RAAGUL GANANATHAN

SOFTWARE ENGINEER

Wellawatte, 00600 Colombo, LK | +94 77 521 4895 | raagul.gana@gmail.com
@RaagulGananathan | @RaagulGananathan13 | My Portfolio

A motivated final-year BSc Information Technology undergraduate at Sri Lanka Institute of Information Technology with a strong foundation in software development, database management, and systems analysis. Experienced in full-stack web development, AI/ML research, and contributing to production-deployed applications. Passionate about leveraging technology to solve real-world problems and seeking opportunities to grow within a professional IT environment.

WORK EXPERIENCE

Software Engineer (Part Time) **Aug 2025 - Present**
Fexten Solutions (Pvt) Ltd

- Resolved production bugs across live ERP modules ensuring system stability
- Designed and implemented backend database schemas to support business operations
- Developed server-side logic and frontend UI components across POS, Inventory Management, HCM/Payroll, and Accounting & Finance modules
- Wrote and maintained test scripts to validate module functionality and ensure code quality
- Gained hands-on ERP domain knowledge across core business operations

Intern Software Engineer **Oct 2025 - Present**
Techorin

- Contributed to the development of the Genius Bees Educational Platform as an intern, working across frontend using JavaScript. Responsibilities included building UI pages, developing server-side logic, designing database schemas, and contributing to the admin panel for content and user management.

Intern Full Stack Developer **Feb 2025 - Sept 2025**
Sri Lanka Telecom PLC

- **NCPA Complaint Portal Revamp** — Revamped the NCPA complaint portal using the MERN stack, developing frontend components, backend modules, and contributing to BRD preparation.
- **Digital Identity Hub (MYSLT)** — Built backend RESTful APIs following TM Forum standards, Contributed to biometric login, Google Passkeys, and multi-device session tracking features.

EDUCATION

SRI LANKA INSTITUTE OF INFORMATION TECHNOLOGY **Feb 2023 - Nov 2026**
BSc (Hons) in Information Technology

- Deans List (Y3S2)

Primary & Secondary Education **Jan 2008 - July 2021**
Hindu College Colombo

AREA OF EXPERTISE

React.js	Express.js	JAVA	Python	AWS (EC2, S3)	Power BI	SAP
SQL	Node.js	Spring Boot	Fast API	Docker	Jupyter Notebook	ERP Domain

PROJECTS & CONTRIBUTIONS

- **FedMed — Federated MultiModal Medical AI** • **RESEARCH · IN PROGRESS**

  Privacy-preserving federated learning system for multi-disease diagnosis using 5-channel multi-modal inputs (chest X-rays, lab values, clinical notes). Implements custom DW-FedAvg aggregation with disease-aware fusion, achieving 0.89 AUROC across 2 hospitals without sharing patient data.

  Tech Stack: Python, PyTorch, Federated Learning, DenseNet-121, BioClinicalBERT

- **Candy Shop E-commerce (UK Client)** • **DEPLOYED · LIVE**

  Full-stack e-commerce platform for a UK-based candy retailer with product catalog, user authentication, shopping cart, checkout, and admin dashboard. Designed for production deployment with responsive mobile-first UI.

  Tech Stack: React 19, Tailwind CSS, Node.js, Express.js, MySQL, Firebase, Selenium

- **ShopsTime - UK Staff Wages Portal** • **DEPLOYED · LIVE**

  Production-deployed supermarket staff management system for a UK-based client. Includes employee management, payroll exports, attendance tracking, and automated Excel report generation.

  Tech Stack: React 19, Tailwind CSS, Node.js, Express.js, MySQL, AWS

- **Brain Tumor Detection System** • **ACADEMIC**

  AI-powered brain tumor classification achieving 99.39% accuracy using an ensemble of 4 deep learning models. Features 6 XAI visualization methods, batch processing, and AI-generated medical reports via Gemini 2.0 Flash.

  Tech Stack: PyTorch, Python, Flask, face-api.js, XAI, MongoDB

- **Car Service Management System with AI Damage Detection and E-Commerce Integration** • **ACADEMIC**

  The Car Service Management System is a web platform using AI to detect vehicle damage, manage service appointments, and support e-commerce for parts. Built with the MERN stack, it features real-time tracking, an AI chatbot for assistance, and WhatsApp notifications. It improved service speed by 30% and received 85% user satisfaction in pilot tests.

  Tech Stack: React 19, Tailwind CSS, Node.js, Express.js, MySQL, Firebase, Selenium

- **Skill-Sharing & Learning Platform** • **ACADEMIC**

  Developed a coding focused skill-sharing platform using Spring Boot, allowing users to post images/videos, track learning progress, and share structured learning plans. Implemented interactive features such as likes, editable/deletable comments, and follower based content feeds. Integrated OAuth

  Tech Stack: JAVA, SpringBoot, React 19, Tailwind CSS, Node.js, Express.js, PostgreSQL
